PROFILE

Aspiring software engineer and 2026 B.E. graduate in Computer and Communication Engineering with strong foundations in **Java**, **AWS**, and **SQL**. Seeking to contribute to the technology consulting practice by designing, developing, and deploying scalable cloud-based solutions while continuously learning cutting-edge technologies.

EDUCATION

B.E / Computer and Communication Engineering 2026
Sri Sairam Institute of Technology Chennai
Current CGPA : 8.4

SKILLS

Programming Language- Java
Web Technologies- Html, CSS, Java script
Core Domain - AWS , Computer Networks
Database - SQL
Soft Skills - Problem-solving, Teamwork, well-Communication, Decision-Making

INTERNSHIP

NIRLOBA IT PVT LTD Chennai
Backend Developer Intern
Developed the backend of a Bank Management System using Python, focusing on secure handling of user Accounts and banking operations during a 30-day internship program. Achieved an improvement in processing speed for core banking tasks by optimizing database interactions and streamlining low level design and development environment using Python and Linux-based scripting.

TRIOS TECHNOLOGIES Chennai
Data Science Intern
Improved churn prediction accuracy for a banking dataset through data cleaning, feature engineering, and machine learning using Python (Pandas, NumPy), developed an end-to-end customer segmentation model that increased marketing campaign efficiency and met business goals, and built an automated data analysis pipeline to clean, process, and visualize large transaction datasets using Pandas and Seaborn, reducing manual effort and improving reliability.

PROJECTS

Rescue The Overboard Person From Water| IOT
Engineered a wearable watch prototype featuring heart rate and temperature monitoring using LoRa technology, enabling real-time alerts, to enhance maritime crew safety protocols.

Hotel Booking Management System | MySQL
Designed a relational database with 8 normalized tables using keys.Wrote SQL queries using JOINs, aggregate functions, and subqueries for revenue tracking and occupancy analysis.Created Views for booking summaries and implemented Stored Procedures.

Beauty Product E-Commerce Website|Html,Css,JavaScript
Developed a responsive beauty product e-commerce website using HTML, CSS, and JavaScript that allows users to browse and select skincare and cosmetic products. Implemented product listings, user-friendly navigation, and interactive features to enhance the online shopping experience.

Oracle Forms & Reports — Employee-Department Management System|ORACLE
Developed a database-driven application using Oracle Forms Builder and SQL Developer, implementing a master-detail form with DEPARTMENTS and EMPLOYEES tables, featuring LOVs, sequence-based auto ID generation, formula fields, and custom menus deployed on WebLogic Server.

RESEARCH PUBLICATION

"RESCUE THE OVERBOARD PERSON FROM WATER" 2025
Published in IEEE Scopus-Indexed Conference Proceedings, 2025. Presented innovative IoT-based wearable solution for maritime crew safety using LoRa communication technology.

ACHIEVEMENTS

- **IEEE YESIST12 2025** - Grand Finalist: Selected among top international finalists at IEEE YESIST12 2025 Maker Fair, organized by IEEE UKM Student Branch, Malaysia.
- **TANCAM Hackathon** - Selected for the second round out of a highly competitive national pool of participants.
- **Hack4Purpose**- Earned certification for participation in the Hack4Purpose hackathon.
- **IEEE Situational Panel** — Finalist: Finalist in the Situational Panel competition conducted by IEEE.
- **AI-SDG Hackathon** - Participated in the prestigious hackathon jointly conducted by ETH Zurich and Nanyang Technological University, Singapore.

CERTIFICATES

- Fita Academy - Completed course in Aws Devops
- Nptel -Completed course in Cloud Computing and Intenet of Things
